## SUMMARY

Senior QA Automation Engineer with over 6 years of experience ensuring software quality through automated and functional testing. Practiced at test automation with Selenium, Cypress, and Playwright, API testing with Postman, and CI/CD pipeline integration. Seeking opportunities to drive quality assurance excellence and optimize testing processes at a company focused on innovation and software reliability.

## SKILLS

JavaScript | Typescript | Docker | GitHub Actions CI/CD | Git | Playwright | SQL | JIRA | Bash | Cypress  
Selenium | HTML | CSS | Python | iOS | Android | Mobile testing | AWS | BDD | TDD | Cucumber

## PROFESSIONAL EXPERIENCE

**Senior Quality Assurance Engineer at EarnIn** | 04/2024 - 11/2024

Thailand, Bangkok

- Formulated a detailed test plan and performed functional, regression, and compatibility testing across five major platforms for the company's marketing site; ensured seamless user experiences while launching new features.
- Created an end-to-end testing pipeline with GitHub Actions CI/CD, now utilized by over 15 developers, optimizing workflow efficiency and accelerating release schedules for key software products.
- Configured Datadog monitoring and established real-time Slack alerts, ensuring immediate tracking of application performance metrics; detected abnormalities helped to identify root cause of severe system crashes.
- Developed a reporting framework that streamlined the analysis of test results and quality metrics, enabling stakeholders to access real-time updates, which improved decision-making efficiency across departments by 40%.
- **Identified, documented, and tracked** defects using the bug tracking tool **JIRA**, collaborating with development teams to resolve issues.

**Senior Quality Engineer at Opn payments** | 01/2023 - 04/2024

Thailand, Bangkok

- Implemented an automated regression test suite using Cypress and JavaScript, which reduced auto-testing time by 15 min and accelerated the overall product delivery process.
- Maintained CI/CD pipelines to verify that Robot Framework end-to-end tests written in Python remained robust and up-to-date, improving test stability.
- Conducted detailed **REST API** evaluations with **Postman** and Swagger and identified critical performance bottlenecks that enabled enhancements which improved response times by 200 ms.
- Enhanced coding standards across over 15 Open Source libraries using languages such as Python, JavaScript, and Go; identified significant vulnerabilities that improved overall system integrity by implementing systematic testing processes.

## Senior Quality Assurance Engineer at CREA | 03/2021 - 12/2022

Thailand, Bangkok

- Orchestrated UAT for API integrations, enabling real-time data exchange between Odoo and SAP; streamlined workflows led to a reduction in manual entry tasks by 300 hours annually for the finance department.
- Conveyed comprehensive functional testing for the Promotion Service API, identifying and resolving 30+ critical bugs in the gift-issuing engine that enhanced operational efficiency while generating substantial cost savings across processes.
- Manually verified integrations with **AWS** services, including Lambda, S3, and SQS.
- Executed complex SQL queries utilizing SELECT, JOIN, UPDATE, and WITH statements to extract actionable insights from large datasets.
- Coordinated efforts with remote software development teams to troubleshoot and resolve 50+ critical issues weekly; implemented a streamlined reporting system that decreased average problem resolution time from 72 hours to 24 hours.

## Quality Assurance Engineer at Omise | 04/2020 - 01/2021

Thailand, Bangkok

- Collaborated with the automation team to develop and maintain automation scripts in Ruby.
- Saved \$5,000 by conducting internal testing for a mobile product ahead of an expensive **PCI-DSS** certification from an international provider, ensuring the application passed on the first attempt.
- Defined essential test scenarios, **estimated** testing efforts, and **developed** comprehensive test plans.

## Quality Assurance Engineer at Travpax | 01/2019 - 03/2020

Thailand, Bangkok

- Designed and executed performance tests using JMeter to identify bottlenecks in internal APIs.
- Tested RESTful APIs with Postman and XML SOAP APIs with SoapUI.
- Acted as a **Business Analyst** when required for API integration projects to finalize business requirements.

## Software Tester at Yandex | 10/2018 - 12/2018

Moscow, Russia

- Conducted mobile application testing for Yandex.Disk (cloud drive) and Yandex.Mail (Android/iOS).

## Software Test Engineer at Svetets | 09/2018 - 10/2018

Moscow, Russia

- Utilized Chrome DevTools and Selenium WebDriver to debug and maintain test automation.

## EDUCATION

**Bachelor's Degree** from Siberian State Aerospace University, Russia | 2015

- Major in Automated Systems of Information Processing and Management

## CERTIFICATION

**ISTQB** CTFL, ASTQB | 2024
